Subject:	RE: 2019 harvest updates: May 1

Hi Diane,
I have connected with my colleague who can provide a preliminary estimate of total active vessels, please note the data is subject to revision. An estimated 142 vessels have been active for the 2019 harvest, with potential for another 27 vessels participating.

At this time we cannot estimate the number or vessels active for this week, as it would be quite unreliable.

Let me know if you have any questions and I can try my best to answer them,
Courtney

Thank you for the update, Courtney. I did not get the number of active vessels from you. I would like the total number for the year as well as the currently active ones this week.
